

## Mini Star Kits

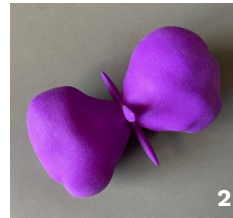

with NASA's Universe of Learning

*Explore 3 stellar objects in our Milky Way: star birth, a mature star system, and an exploded star.*

1. M16 (Pillars of Creation) is a nearby star-forming region with tall columns of gas and dust.

2. Eta Carinae is a system of two massive stars that produced an explosion resulting in two polar lobes.

3. The Crab Nebula is the remnant of a supernova, with a pulsar at its core.
